

RF Integrity 'Heartbeat' Transmitter

Part No. **QT421**

Overview

- The QT421 Monitored RF Integrity Transmitter is intended for use with Quantec's QT422RX Radio Receivers.
- Helps ensure RF integrity and site coverage at all times by sending a periodic RF test transmission to Receivers with the same RF group address.
- Flags a fault at the Quantec Controller if a transmission is not received.
- Typically located at strategic points on the installation - we recommend at least one RF Integrity Transmitter is used per Radio Receiver.
- Mountable on a 25mm UK single gang back box.
- Takes its power from the Quantec network but is not an addressable device as it is monitored by the radio receiver(s) it is set to work with.

More Information

Technical Specifications

Compatibility	Designed to work with QT422RX Radio Receivers
Power requirements	Powered from the Quantec network.
Quiescent current	TBC.
Indicators	Heartbeat LED (flashes on test transmission)
Controls	RF Group ID dipswitch allows the transmitter to be set up with the same RF Group ID as the radio receiver(s) you intend to use it with.
Connections	Net +: Net -

Product dimensions (mm)	87 W x 87 H x 35 D mm. Can be mounted on a standard UK 25mm single gang flush or surface back box.
Construction & finish	Plastic.
IP Rating	TBC.
Weight	TBC.
Operating conditions/temperature	-5°C to +40°C. Max relative humidity: 95%.
