

HealthPro

All Your Devices, One Health Dashboard

Cloud-powered System Monitoring & Maintenance Platform

HealthPro

Top 4 Use Cases

HealthPro is a 'Health Monitoring + Asset Management' platform that aggregates data from scattered field to the cloud, allowing you to manage everything from a single dashboard.

CASE 01 Integrate **Diverse Devices**

Seamless Connectivity Across Devices

- Device health check (summary to detail)
- 3rd party support (Axis, i-PRO, ONVIF, etc.)
- Flexible integration via HealthPro Bridge

CASE 02 Centralize **Remote Sites**

Real-time Multi-Site Monitoring

- Register up to 5,000 sites simultaneously
- Device status & monitoring by location
- Map & Chart-based dashboard

CASE 03 Ensure **Proactive Stability**

Event Detection & Remote Control

- 24/7 Real-time monitoring
- Event detection & alert
(Camera disconnection, Server errors, etc.)
- Remote control and configuration

CASE 04 Automate **Maintenance Tasks**

Automate Maintenance Tasks

- Automated health reports
- Product lifecycle management
(Manufacturing date, EOL, Warranty expiration, etc.)
- Software (Firmware) update management

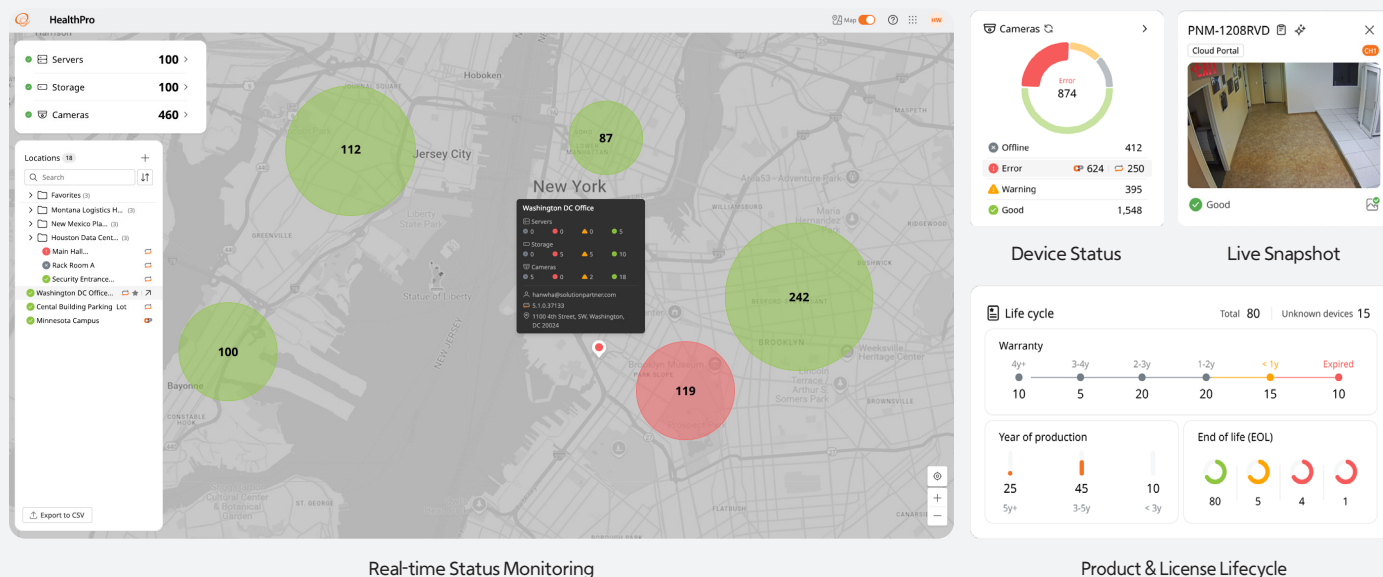

A cloud service with no privacy concerns

HealthPro ensures robust privacy protection and data reliability by selectively extracting only text data, not video footage. Secure both the convenience of remote management and data privacy at the same time.

Bring Every Remote Site to Your Fingertips

Manage CPU, memory, and storage status for all devices on a single dashboard.
Gain instant visibility into distributed sites via Map View.

Health Monitoring

- ✓ Real-time Status Monitoring
- ✓ Automated Reporting
- ✓ Multi-Site Management
- ✓ Remote Configuration

Asset Management

- ✓ Lifecycle Management
- ✓ Software Updates
- ✓ Event Detection & Tracking
- ✓ Camera & PoE Reboot
